

T.P. TO COAST BY END OF 1913

President Chamberlin Tells of the
Work in Progress Along the
New Railway.

WILL ESTABLISH NEW
PACIFIC LINE IN 1914

able to Handle Thirty Million
bushels of Grain This Year
Against Eighteen Last Year.

Amherst, June 19.—Mr. E. T. Palmer, president of the G. T. P. Grand Trunk Railway, will start Sunday or Monday next on an official tour of the system, going to Chicago and on to Winnipeg. The president will then proceed over the Grand Trunk Pacific as far as the coast, leaving the Inspector of the Pacific coast section until later in the season.

During an interview today, Mr. Palmer made the following statement: "Unfavorable conditions prevent it, the Grand Trunk Pacific will be sold from Port William to the west coast of Canada in a year or two. A friendly company has been selected the Vancouver branch from 'Pilot' to the west coast of British Columbia's present report, while J. B. McArthur is the head of another friendly company. The route would be through the country, a distance of 250 miles from Montreal.

...aters assure him that, sailing from

Mr. Chamberlin made an estimate of the amount of grain the G. T. P. could probably haul out of the prairie country this year. Against 15,000

ed that the figure this year would be near thirty million.

Speaking of the crop, Mr. Chamberlain said that although he had not received late intelligence he was convinced that with good weather conditions the crop for 1912 should reach at least 250,000,000 bushels.

The Cement Trouble

Mr. Chamberlain said he had been following the cement controversy and claimed that the blame could not be laid on the back of the railways.

moderation on the lakes. The president is of the opinion that the Grand Pacific has been exceedingly unskilful in securing the services of Donaldson as vice president and general manager west of the great divide. "He does not make much noise," said the president, "but he is a very shrewd man and I think he will make a lord among the big railway men who have been operating in the west." Later on, said Mr. Chamberlin, "if the railway grows, another man will be appointed down here as well as for the Atlantic division but at

NEWS OF THE SOUTH SIDE

400 BUILDING PERMITS
SINCE AMALGAMATION

Nearly All Are for Homes on the South Side of Edmonton—May Month Increase of 2,000 Population for City's Homeless in 1912

The following building permits have been taken out at the south side office of the building inspector: R. J. Russell, lot 4, block 13, dwelling, 11,500; Frank W. Hunt, lot 10, block 13, dwelling, 12,500; J. H. Bell, lots 12, 13, block 13, dwelling, 14,500. This makes about 400 building permits taken out since amalgamation on this month last, 1912. This was made nearly about 250 homes built or building on the south side this year, and it is not midsummer yet. Before the end of the building season it is quite likely that 500 new homes will be erected on the south side of Edmonton. With an average of four to a home, this would mean an increase of population of about 2,000. Thus to get a fair census estimate of the South side it will be necessary to take it again in the fall after all these new families are at home.

The new houses are being built for present residents of the South side who will move from tenement houses to new homes of their own, for new arrivals from outside the city, and for citizens who have resided on the North side, but are now moving to the South side since amalgamation. The high level of the new building is not surprising, as the building houses to be built are of a better class, and it is not likely that this condition will change this year.

SOUTH SIDE S. O. E. PARADE. The S. O. E. Lodge No. 212 will parade to Holy Trinity church on Sunday next. All members of the lodge are requested to attend. The lodge room at 315 1/2 pm, over Hick and block, White, Avenue.

RAD WEEDS GROWING FAST. The weeds on the river bank and vacant lots are growing fast and making every effort to ripen their seed heads before the authorities get on the ground. The weeds are growing fast and making every effort to ripen their seed heads before the authorities get on the ground. The weeds are growing fast and making every effort to ripen their seed heads before the authorities get on the ground.

RENT-FISHER. Miss Ruby Fisher and Albert Kent were married on Wednesday morning at the home of the bride by Rev. M. Miller. Friends and relatives gathered to witness the ceremony and with the young people across to the new home.

\$500.00 for 25 Jingles in June

(We paid \$1000.00 for 25 Jingles in May)

\$500.00 will be paid in June, 1912, for Post Toasties Jingles—\$20.00 to each of 25 persons who send in crisp, snappy Jingles—most acceptable for a "Post Toasties" Jingle Book.

Names of persons from whom Postum Cereal Co., purchased Post Toasties Jingles in May will be mailed on receipt of stamped and addressed envelope.

We Paid \$20.00 for this Original May Jingle
(taken as example only)

There is an old woman of Crewe,
Who vows she has nothing to do,
She is happy and gay, eats Toasties all day
And now she's 102.

Eld, Guelph, Ont.; J. O. Shaght, W. S. Lewis.

CONVENTION BEING HELD.

A census city has sprung up on the block which corners Third Avenue North and Seventh Street, West, South Edmonton. Fifty family tents, 12x18 ft., are being pitched on the block, and a vegetable cafe, and a book tent have been erected, giving the place the appearance of a military camp. Here the Alberta convention of Seventh Street, Guelph, Ont.; J. O. Shaght, W. S. Lewis.

The vegetarian cafe, which is in charge of a lady from the Alberta Industrial Academy of Lacrosse, is ready in operation, supplying meals for the workers, who for the past week have been actively engaged in making preparations for the comfort and convenience of the three hundred or more delegates to the convention who will attend the conference. At the block tent anyone may obtain a variety of books, postcards and tracts, in any of the leading languages spoken in Alberta, on the subject of the Advent message. The first meeting of the series will be held on Thursday, June 20th, at 5 pm. Meetings will be conducted in the languages of German and Scandinavian languages. Visitors will have no difficulty in finding the camp around as the South Edmonton street car runs to it. All are cordially invited to attend.

LOCAL.

Henry Mayer, of Pigeon Lake, drove into the city yesterday. Having been at Edmonton in the early days when his father was an employee of the Hudson Bay Co., he has made

many interesting comparisons to make with the city of 1912. His father, he says, had sold it for \$1,000. In 1882, the new high level bridge of 1912, he remembered the time when there was no bridge and not even a ferry and the river had to be forded. Development is also marked between Edmonton and Pigeon Lake. The grain crops were all looking fine and conditions give promise of an excellent harvest.

WINNIPEG CANNOT GET
CEMENT TENDERED FOR

Lehigh Portland Cement Co. is Unable to Meet Demand and Will Have to Pay Freight—Million Dollars Lost—City Council Told of Loss of Medicine Hat.

Winnipeg, June 18.—Owing to the unusually large demand for cement in the Northern United States at the present time, the Lehigh Portland Cement company, which has the contract for the supply of cement to the city, has been unable to supply the necessary amount, and this morning the board of control decided to authorize the city engineer to order the necessary amount for the city works there. Under the terms of the contract with the Lehigh company the latter will have to make up the difference in price to the city, and it will be liable also to a penalty of \$10 a day. The Lehigh company shipped its first consignment of cement to the city in January, but though its mills have been working day and night since then, it has been unable to keep up with the demand. The city engineer was instructed to draw up a formal notice of the action of the board and to send it to the company.

May Erect Plant at the Hat. Montreal, June 18.—A million dollar cement plant at Medicine Hat is under consideration by the Canada Cement Company as a step toward meeting the demand for this commodity in the west.

Montreal, June 18.—The mayor of Medicine Hat, was in town a few days ago to confer with P. J. Jones, general manager of the Canada Cement Company, in regard to the proposed enterprise, and said his visit had been successful. The mayor of Medicine Hat is under consideration by the Canada Cement Company as a step toward meeting the demand for this commodity in the west.

KILLED BY LIGHTNING.

Birch Hills, Sask., June 19.—J. McDonald, 13 years of age, was killed by lightning last night while riding with John Shaght, about ten miles northwest of here. One horse was killed, and the other three horses knocked down by the lightning. Mr. Shaght was also knocked unconscious. The storm was a severe one here, and the lightning was extremely sharp.

DYSPEPSIA MADE
THE MISERABLE

Suffered Agony Until
"Fruit-a-Lives" Cured Him

Hundreds of people daily testify to the wonderful curative powers of the famous fruit medicine, "Fruit-a-Lives." To those now suffering with indigestion, dyspepsia or other stomach troubles, this letter of Mr. Stirling, the well known writer of the "Fruit-a-Lives" advertisement, shows the way to a speedy and certain cure.

Quebec, Oct., 1908, 1911
"Fruit-a-Lives" were so beneficial to me when I suffered with indigestion, dyspepsia, that I wish to inform you of my satisfactory results.

Although I have, in past, suffered again with dyspepsia, I have now in perfect health. "Fruit-a-Lives" accomplished the desired result.

"Fruit-a-Lives" will cure every trace of indigestion, dyspepsia, flatulence, bloating, pain after eating, biliousness and constipation.

"Fruit-a-Lives" is the only remedy in the world made of fruit, healthful and valuable tonic.

Price a box for \$5.00, list, 25c. At all dealers or sent on receipt of price by Fruit-a-Lives Limited, Ottawa.

MANUFACTURED RUBBER
AT 24 CENTS A POUND

British Subjects Claim to Have Discovered Process by Which New Synthetic Rubber May Be Made and Manufactured Cheaper Than the Natural Product.

London, June 19.—Sir Wm. Ramsay in this morning's Post, discussing the announcement of Prof. Wm. Ramsay that he and a group of other chemists have discovered a process by which synthetic rubber may be placed on the market at 24 cents a pound, says:—

The process of making synthetic rubber is one on which a fortune has been made in the last two years and a half. Prof. Ramsay has succeeded in finding a method of producing synthetic rubber at one-third part the cost of the natural rubber, and this discovery is of the first importance as the cost of acetone is £40 a ton and that of butyl alcohol £10 a ton.

"Moreover acetone is essential to the manufacture of nitrates, which at present we derive from Germany. The greatest advantage of the discovery is that starch cannot be converted into rubber."

"There was a race between the English and the German chemists, but the English won. A few years ago it was thought that synthetic rubber would eventually cost natural rubber, but it will be a long time before it can be made so cheap."

Prof. Ramsay said last night: "Synthetic rubber can be produced at 24 cents a pound. It is obvious that this can compete with the natural rubber at 24 cents a pound, but it may be a long time before it can be made so cheap."

"The Morning Post" financial editor says: "The attitude of the brokers toward the announcement is one of indifference. They are waiting to see what the market will do before they move toward speculation."

The Times says: "This discovery is of the first importance as the cost of acetone is £40 a ton and that of butyl alcohol £10 a ton."

MARRIAGE CASE TO GO TO
PRIVY COUNCIL AT ONCE

Dominion government is anxious to get final judgment at the highest possible moment—same lawyers will argue the case in England.

Ottawa, June 19.—The last word in the marriage controversy, arising out of the no-temperance and tobacco habit of Rev. Dr. Franklin, was heard today in the Toronto court yesterday.

The Dominion government, realizing the great importance, is anxious to have the question settled as soon as possible and with this in view, Hon. C. J. Doherty, minister of justice, who was in England on June 16th, will apply to the privy council for leave to appeal.

Mr. Doherty will not only be granted and the case can then be argued this autumn. In some law cases where the case before the privy council will be retained in the court, but in this case it will go to the privy council.

To Keep Skin White,
Velvety, Wrinkle-Free

(Just Daily in Woman's Realm)
C. M. W. says: "My arms are so coarse and rough I cannot wear sleeveless. What do you advise?" This treatment recommended to "Anna" who doubtless overcame this condition.

A. F. J. advises: "What should I do to keep my face and neck so free from blemishes? Try a wash twice daily with a little of the powdered salicine in 1-2 pint of water. This is a most successful feature in any wrinkled or flabby condition. Use daily for six or eight weeks and you will be surprised at the results it will give you."

Anna: A simple plan to keep your skin smooth, soft and white is to apply ordinary macerated with Rose Water, washing it off in the morning. This keeps the face free from the particles of fluff which which constantly appear. The skin is then worn-out particles, so the younger, fresher, healthier skin is always there. An ounce of macerated will be had at any drug store. The like cold cream.

THE PRICE OF HOMAGE

ANCE when King Edward VII. paid a visit to Sheffield, all the fires in factories and plants were allowed to die out. Not a wheel in Sheffield turned for twenty-four hours.

The primary object of this was to lift the pall of smoke that hovers over that wonderful steel-producing city, and to ensure, as far as man was able, a bright day and a blue sky for an auspicious occasion.

It was Sheffield's expression of respect.

But the action was unique—it was unprecedented—it was unthought of that those hundreds of mighty furnaces, raging night and day, and those smoking boilers, with quivering valves, should ever be allowed to cool.

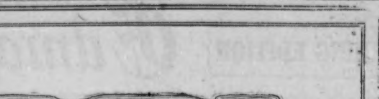

This extinguishing of fires cost Sheffield hundreds of thousands of dollars—the price of the effort to get back again to high-power efficiency.

SOME business men in Canada pay an unwilling homage, not to a king, but to a superstition—the superstition that hot weather justifies letting the fires of business go out. They stop Advertising in the Summer months.

By paying homage to tradition, custom, superstition, they have allowed Summer to become their "dull" season. Do you know how dull it can be when you don't advertise? Do you know how brisk it can be made by Advertising? Do you realize how much momentum you now lose in the Summer that must be regained in the Fall?

DON'T LET YOUR ADVERTISING FIRES DIE
OUT THIS SUMMER.

Advice regarding your advertising problems is available through any recognized Canadian advertising agency, or the Secretary of the Canadian Press Association, Room 303 Lansdowne Building, Toronto. Enquiry involves no obligation on your part—so write, if interested.

FORT McMURRAY

A Coming Great Electric, Oil, Mining, Industrial and Distributing City Now in its Swadling Clothes

A NEW STAR IN THE REAL ESTATE FIRMAMENT—SHINING BRIGHTLY

What Fort McMurray Bases Its Future Greatness Upon

LUMBER

Along all the streams and lakes in the Fort McMurray District, large timber limits of poplar, white spruce, jack pine, tamarack and birch exist. These varieties are all well suited for lumber. In fact, it is well known that sufficient timber exists in this district to supply all Western Canada with lumber for several generations to come. Many are already seeking saw-mill sites at Fort McMurray and this industry employing thousands will undoubtedly be well established in advance of the Railway.

PULP WOOD

The white spruce and the poplar, the two varieties of timber best suited for pulp manufacture, predominate in the Fort McMurray District. The manufacture of pulp and paper should speedily become a Fort McMurray leading industry. Cheap electric power so easily available will aid this greatly.

ASPHALT

World's Greatest Deposits.
The enormous outcrop of tar sands in the vicinity of Fort McMurray depends chiefly for their commercial value upon railway transportation. Analysis of these sands show that it is composed of 81.73 per cent. of silicious sands, 5.53 per cent. of water, mechanically mixed, and 12.42 per cent. of pure bitumen or mineral tar. In its native state and with very little refining it may be used for paving, roofing and many other commercial purposes. The pure asphalt, rock asphalt and tar sands found here in inexhaustible quantities are ever in great demand, commanding a high price in the markets of the world, will give to Fort McMurray enormous wealth. Their mining, refining and manufacture will give employment to thousands:

"During the warm weather tar, or this pitch, free from any mixture of sand, comes out of the bogs, as if by spontaneous means, in places where the black strata appears to be superimposed with the black, petroleiferous strata. It is sometimes found in considerable quantities, but it is possible that the tar also rises in some places from pressure beneath. It is taken in barrels to the posts of the Hudson's Bay Company and to the Mission stations and, after boiling it down so that it will harden on cooling, it is used for putting over boats, roofs, etc."

Geographical Report, 1901, Pages 21, 22

GLASS

The tar sands in the Fort McMurray District provide the two essentials for a glass making industry—the tar and the silica, for tar sand burns freely if supplied with sufficient air, and the sands consist of grains of pure vitreous quartz, suitable for

the manufacture of the finest white glass. This industry alone should be developed to employ thousands of men, adding further to Fort McMurray's greatness.

GAS

Of combustible material the Fort McMurray District has beneath its soil assets that occasionally proves embarrassing, as when being for petroleum a flow of natural gas is released which cannot be capped for some time, and whose roar can be heard for two or three miles. Gas in great quantities, plenty of wood and nearness of great bodies of coal will supply the coming great city of Fort McMurray with plenty of light and heat.

OIL

As to the possibilities of striking oil, according to reports made by prominent experts and geographical surveyors, there is lying under the ground in the Fort McMurray District, other deposits of oil than those in California. Several boring outfits are already in the field. The oil is there. It has already been tapped and every indication points to a tremendous flow as soon as the wells are sunk deeper. In all probability the drills now in the field will reach the main oil bearing sands before the close of the 1912 season. The result will be a rush to these fields, the like of which has never been seen before on the American continent.

SALT

Near Fort Smith, on the Northern frontier and tributary to Fort McMurray by waterway, there is a very extensive bed of salt on the surface. Adjoining Fort McMurray an oil prospecting concern, penetrated during boring operations, a layer of rock salt two hundred feet in thickness. The water of Salt Springs just below Fort McMurray, is so heavily impregnated with salt that large banks of salt have been deposited on the surface. Salt refining is a profitable industry and the product always finds a ready market. This industry bids fair to add to Fort McMurray's renown.

FURS—FISH

The furs of the great North Country will always bring a certain amount of wealth to Fort McMurray. The cold waters of Northern Canada's streams and lakes, produce the finest fish, the leading varieties, the trout and white fish are in great demand among the Europeans in the cities of Eastern Canada and the United States. The curing and packing of fish will undoubtedly become a profitable industry, employing many.

AGRICULTURE

The region tributary to Fort McMurray is one of great rivers, lakes and forests, containing the immense valleys of the Athabasca, Clearwater and Lower Peace River, comprising a magnificent extent of land only waiting for a railway to make it take rank as some of the finest stretches of territory in the province. One Government explorer states that the Clearwater Valley alone will accommodate 350,000 settlers.

"No further proof of the splendid home making possibilities to be found in Northern Alberta can be needed when it is remembered that the prize wheat exhibited as long ago as 1876 at the Centennial Exhibition held in Philadelphia, U.S.A., was grown at Fort Chipewyan on Lake Athabasca in latitude 59 degrees, 150 miles north of the International Boundary. Moreover, far up at Vermilion-on-the-Pace, 100 miles from the nearest railway point, Edmonton, in a latitude almost as far north as Northern Labrador, yet in a country of luxuriant growth and mild climate, a modern electric lighted flour mill, with a capacity of 35 barrels a day, has been in operation for some years for the sole purpose of dealing with the wheat grown in the vicinity. But it must not be forgotten that altitude makes more difference in the successful growth of crops than latitude, and Vermilion is only 550 feet above sea-level, while Edmonton is 2158 feet and Calgary is 3889 feet." All this vast productive agricultural territory is directly tributary to Fort McMurray by navigable water routes, the very cheapest method of transportation, and the completion of the railway to Fort McMurray will bring this great territory into direct communication with the outside world.

FLOUR MILLS

Electric power has always been a potent factor in the upbuilding of the milling industry. Fort McMurray will have the power. The great valleys tributary will grow millions of bushels of wheat. All this wheat must eventually be transferred at Fort McMurray from boat to train. Is it not reasonable to suppose that elevators of large capacity for the storing of this grain and mills for its manufacture into flour will be built there?

ELECTRIC POWER

Cheap power is a necessary requisite for the upbuilding of large industries. For Fort McMurray is well favored in this respect. Just south of Fort McMurray and in view from the hills, the Athabasca River breaks into a series of Rapids from which, according to authority, nearly a quarter of a million horsepower can be derived. The Grand Rapids on

the river above Fort McMurray, a magnificent spectacle, could in their descent of sixty feet in a quarter of a mile develop at least 60,000 horsepower, in an ordinary season.

OTHER RESOURCES

Other natural resources known to exist in this country are gold, copper, galena, iron ore, silver, mica, limestone, sandstone and gypsum, all of which will require capital and labor for their development.

TRANSPORTATION

All Fort McMurray needs now to start it on its road to greatness is a Railroad. That need is soon to be supplied. The last session of the Alberta Parliament guaranteed the bonds for a C. N. R. extension to Fort McMurray. Surveyors are already in the field. Construction work will be rushed to rapid completion. Then will millions upon millions of long waiting capital pour into Fort McMurray to develop the known great natural resources of this district, an empire in extent. Then will thousands of settlers and city-builders flock to this richly favored section. The great river highways of the North will provide easy and cheap communication for all this vast territory with Fort McMurray the head of navigation in the Athabasca River. Railways will in the course of a few years radiate in every direction out of Fort McMurray, but the great water highways will always remain to serve throughout this vast territory in keeping down freight and passenger rates to Fort McMurray the distributing and manufacturing center.

Special—

Since this advertisement was written English Capitalists, realizing the future greatness of Fort McMurray and the wonderful richness of the great north country tributary, have arranged to build a second railway without Government aid from Edmonton to Fort McMurray and from there westward to the Peace River and eastward to the Hudson's Bay, to connect with a fleet of ocean-going steamers. This new road, it is understood, will become a fourth transcontinental line. It is proposed by this syndicate, which is backed by The London and Dominion Trust Co., representing \$45,000,000 of capital, to have the line from Edmonton to Fort McMurray in operation within two years, from which point the east and west extensions will be built.

Mr. Evelyn Wrench in City to Perfect Organization of Branch

EDMONTON HAS 350 MEMBERS OF CLUB

Object is To Further the Unification of the British Empire

Evelyn Wrench, the founder and organizer of the Overseas Club, from London, England, and the present time touring the Dominion with the object of bringing the 75 Canadian branches of the club into closer touch with one another and with the British Empire. Mr. Wrench is now in Edmonton. He has addressed a large number of meetings on his way north-west since landing at New York.

The Overseas Club originated at Aulsebrook Hall, Ottawa, where Mr. Wrench was staying at the Hotel as guest of Lord Grey, then the governor general of Canada. The club is a secret society, the object of which is the closer union of the various parts of the British Empire. Formed in August, 1910, the club made rapid progress. By July 1st of last year its membership was 350. It had a membership of 15,000 in July of last year. The club is now on the verge of a new era. There are now 75 branches in the Dominion, and the club is now on the verge of a new era. There are now 75 branches in the Dominion, and the club is now on the verge of a new era.

THROW INFLUENCE TO PREMIER SCOTT

T. J. Agnew, prominent Prince Albert newspaper, will give support to Hon. and Chas. G. Diefenbaker, who may become Independent Candidate in Cumberland.

Prince Albert, June 19.—T. J. Agnew, of Prince Albert, one of the best known and most prominent citizens of the northern prairie province, is in Regina on Monday and during his stay here made known to his friends that he had decided to offer for election in the constituency of Cumberland, an independent candidate in support of the Premier.

In the present contest, Mr. Agnew is throwing the full weight of his influence in support of the Premier, the Liberal opponent of Mr. Diefenbaker. Mr. Agnew takes his stand today in support of the Premier, the Liberal opponent of Mr. Diefenbaker. Mr. Agnew takes his stand today in support of the Premier, the Liberal opponent of Mr. Diefenbaker.

Calgary Chief Clerk Peniston. Toronto, June 18.—Following the recent increase in salary given the police officers, second and third class constables, the Toronto police board announced that a former inspector Cuddy, now chief of the Calgary police, who was on a three months leave at the time, has been granted a pension of \$1,000 a year, which is \$100 more than he would have received had the salary increase not been made.

VANDERLIN IN MONTREAL
Graves Deceased and Old Monument Destroyed
Montreal, June 18.—What is probably one of the worst cases of vandalism ever recorded in this city, has been known today when it was discovered that vandals had disturbed and desecrated the graves of old soldiers buried in the historic military cemetery on Park Avenue.

Not only the graves have been disturbed but the tombstones and columns which mark the last resting place of the dead have been turned, broken up and removed. These graves belong to a number of old soldiers, and the vandals are going to hold an investigation with the police.

BEACON HEIGHTS LOT 13 BOUGHT FRAUDULENTLY

This is Allegation Made Against John Gordon, Charged in District Court With Cash Pretence—Check Was Not Honoured.

A transaction involving a lot in Beacon Heights was the subject of a charge of false pretence made against John Gordon, in the district court before Judge Taylor, today. The charge was made by the agent of the sub-division, Davidson, who is the owner of the lot. The charge was made by the agent of the sub-division, Davidson, who is the owner of the lot. The charge was made by the agent of the sub-division, Davidson, who is the owner of the lot.
